BWM.1/Circ.38
8 September 2016

INTERNATIONAL CONVENTION FOR THE CONTROL AND MANAGEMENT OF SHIPS' BALLAST WATER AND SEDIMENTS, 2004

Acceptance by Finland

Entry into force

The Secretary-General of the International Maritime Organization has the honour to refer to the International Convention for the Control and Management of Ships' Ballast Water and Sediments, 2004, and to state that, with the deposit of an instrument of acceptance by the Republic of Finland, on 8 September 2016, the requirements for the entry into force of the Convention, as set out in article 18(1) thereof, have been fulfilled.

Article 18(1) provides that the Convention shall enter into force 12 months after the date on which not less than 30 States, the combined merchant fleets of which constitute not less than 35% of the gross tonnage of the world's merchant shipping, have either signed it without reservation as to ratification, acceptance or approval, or have deposited the requisite instrument of ratification, acceptance, approval or accession in accordance with article 17.

Therefore, in accordance with article 18(1), the Convention will enter into force on 8 September 2017, twelve months following the date on which the requirements for entry into force were met.

A list of the 52 Contracting States to the Convention appears overleaf, showing their individual gross tonnages as at 8 September 2016, which combined total over 35.14%* of the gross tonnage of the world's merchant shipping.

The instrument of acceptance by Finland contained the following declaration:

"Notwithstanding the schedule set forth in regulation B-3 of the Convention, the Republic of Finland declares, concerning the application of the International Convention for the Control and Management of Ships' Ballast Water and Sediments, 2004, that it will enforce the standards in regulations D-1 and D-2 of the Convention in accordance with Assembly resolution A.1088(28), adopted on 4 December 2013, and with the understanding that the intentions of resolution A.1088(28) apply also to ships operating in sea areas where ballast water exchange in accordance with regulations B-4.1 and D-1 of the Convention is not possible."

* This tonnage percentage is derived from the world tonnage figures provided by IHS/Fairplay, as at 8 September 2016.
